NEW APPLICATION TRANSMITTAL

Transmitted herewith for filing is the patent application of

Inventor(s): RANDI LYNN SCHINDLER

**WARNING:** 37 C.F.R. § 1.41(a)(1) points out:

"(a) A patent is applied for in the name or names of the actual inventor or inventors.

"(1) The inventorship of a nonprovisional application is that inventorship set forth in the oath or declaration as prescribed by § 1.63, except as provided for in § 1.53(d)(4) and § 1.63(d). If an oath or declaration as prescribed by § 1.63 is not filed during the pendency of a nonprovisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(b), unless a petition under this paragraph accompanied by the fee set forth in § 1.17(i) is filed supplying or changing the name or names of the inventor or inventors."

## 1. Type of Application

This new application is for a(n)

(check one applicable item below)

☒ Original (nonprovisional)

☐ Design

☐ Plant

**WARNING:** Do not use this transmittal for a completion in the U.S. of an International Application under 35 U.S.C. 371(c)(4), unless the International Application is being filed as a divisional, continuation or continuation-in-part application.

**WARNING:** Do not use this transmittal for the filing of a provisional application.

**NOTE:** If one of the following 3 items apply, then complete and attach ADDED PAGES FOR NEW APPLICATION TRANSMITTAL WHERE BENEFIT OF A PRIOR U.S. APPLICATION CLAIMED and a NOTIFICATION IN PARENT APPLICATION OF THE FILING OF THIS CONTINUATION APPLICATION.

☐ Divisional.

☐ Continuation.

☐ Continuation-in-part (C-I-P).

## 2. Benefit of Prior U.S. Application(s) (35 U.S.C. 119(e), 120, or 121)

**NOTE:** A nonprovisional application may claim an invention disclosed in one or more prior filed copending nonprovisional applications or copending international applications designating the United States of America. In order for a nonprovisional application to claim the benefit of a prior filed copending nonprovisional application or copending international application designating the United States of America, each prior application must name as an inventor at least one inventor named in the later filed nonprovisional application and disclose the named inventor's invention claimed in at least one claim of the later filed nonprovisional application in the manner provided by the first paragraph of 35 U.S.C. 112. Each prior application must also be:

(i) An international application entitled to a filing date in accordance with PCT Article 11 and designating the United States of America; or

(ii) Complete as set forth in § 1.51(b); or

(iii) Entitled to a filing date as set forth in § 1.53(b) or § 1.53(d) and include the basic filing fee set forth in § 1.16; or

(iv) Entitled to a filing date as set forth in § 1.53(b) and have paid therein the processing and retention fee set forth in § 1.21(l) within the time period set forth in § 1.53(f).

37 C.F.R. § 1.78(a)(1).

**NOTE:** If the new application being transmitted is a divisional, continuation or a continuation-in-part of a parent case, or where the parent case is an International Application which designated the U.S., or benefit of a prior provisional application is claimed, then check the following item and complete and attach ADDED PAGES FOR NEW APPLICATION TRANSMITTAL WHERE BENEFIT OF PRIOR U.S. APPLICATION(S) CLAIMED.

**WARNING:** If an application claims the benefit of the filing date of an earlier filed application under 35 U.S.C. 120, 121 or 365(c), the 20-year term of that application will be based upon the filing date of the earliest U.S. application that the application makes reference to under 35 U.S.C. 120, 121 or 365(c). (35 U.S.C. 154(a)(2) does not take into account, for the determination of the patent term, any application on which priority is claimed under 35 U.S.C. 119, 365(a) or 365(b).) For a c-i-p application, applicant should review whether any claim in the patent that will issue is supported by an earlier application and, if not, the applicant should consider canceling the reference to the earlier filed application. The term of a patent is not based on a claim-by-claim approach. See Notice of April 14, 1995, 60 Fed. Reg. 20,195, at 20,205.

(Application Transmittal [4-1]—page 2 of 11)

864160-2665160

**WARNING:** When the last day of pendency of a provisional application falls on a Saturday, Sunday, or Federal holiday within the District of Columbia, any nonprovisional application claiming benefit of the provisional application **must** be filed prior to the Saturday, Sunday, or Federal holiday within the District of Columbia. See 37 C.F.R. § 1.78(a)(3).

- ☐ The new application being transmitted claims the benefit of prior U.S. application(s). Enclosed are ADDED PAGES FOR NEW APPLICATION TRANSMITTAL WHERE BENEFIT OF PRIOR U.S. APPLICATION(S) CLAIMED.

### 3. Papers Enclosed

- A. Required for filing date under 37 C.F.R. § 1.53(b) (Regular) or 37 C.F.R. § 1.153 (Design) Application

10 Pages of specification - including title page

2 Pages of claims

2 Sheets of drawing

**WARNING:** DO NOT submit original drawings. A high quality copy of the drawings should be supplied when filing a patent application. The drawings that are submitted to the Office must be on strong, white, smooth, and non-shiny paper and meet the standards according to § 1.84. If corrections to the drawings are necessary, they should be made to the original drawing and a high-quality copy of the corrected original drawing then submitted to the Office. Only one copy is required or desired. For comments on proposed then-new 37 CFR 1.84, see Notice of March 9, 1988 (1990 O.G. 57-62).

**NOTE:** "Identifying indicia, if provided, should include the application number or the title of the invention, inventor's name, docket number (if any), and the name and telephone number of a person to call if the Office is unable to match the drawings to the proper application. This information should be placed on the back of each sheet of drawing a minimum distance of 1.5 cm. (5/8 inch) down from the top of the page . . ." 37 C.F.R. 1.84(c)).

**5. Declaration or oath (including power of attorney)**

*NOTE: A newly executed declaration is not required in a continuation or divisional application provided that the prior nonprovisional application contained a declaration as required, the application being filed is by all or fewer than all the inventors named in the prior application, there is no new matter in the application being filed, and a copy of the executed declaration filed in the prior application (showing the signature or an indication thereon that it was signed) is submitted. The copy must be accompanied by a statement requesting deletion of the names of person(s) who are not inventors of the application being filed. If the declaration in the prior application was filed under § 1.47, then a copy of that declaration must be filed accompanied by a copy of the decision granting § 1.47 status or, if a nonsigning person under § 1.47 has subsequently joined in a prior application, then a copy of the subsequently executed declaration must be filed. See 37 C.F.R. §§ 1.63(d)(1)-(3).*

*NOTE: A declaration filed to complete an application must be executed, identify the specification to which it is directed, identify each inventor by full name including family name and at least one given name, without abbreviation together with any other given name or initial, and the residence, post office address and country or citizenship of each inventor, and state whether the inventor is a sole or joint inventor. 37 C.F.R. § 1.63(a)(1)-(4).*

11. Small Entity Statement(s)

- ☒ Statement(s) that this is a filing by a small entity under 37 CFR 1.9 and 1.27 is (are) attached.

**WARNING:** "Status as a small entity must be specifically established in each application or patent in which the status is available and desired. Status as a small entity in one application or patent does not affect any other application or patent, including applications or patents which are directly or indirectly dependent upon the application or patent in which the status has been established. The refiling of an application under § 1.53 as a continuation, division, or continuation-in-part (including a continued prosecution application under § 1.53(d)), or the filing of a reissue application requires a new determination as to continued entitlement to small entity status for the continuing or reissue application. A nonprovisional application claiming benefit under 35 U.S.C. 119(e), 120, 121, or 365(c) of a prior application, or a reissue application may rely on a statement filed in the prior application or in the patent if the nonprovisional application or the reissue application includes a reference to the statement in the prior application or in the patent or includes a copy of the statement in the prior application or in the patent and status as a small entity is still proper and desired. The payment of the small entity basic statutory filing fee will be treated as such a reference for purposes of this section." 37 C.F.R. § 1.28(a)(2).

(Application Transmittal [4-1]—page 8 of 11)

**15. Authorization to Charge Additional Fees**

**WARNING:** If no fees are to be paid on filing, the following items should *not* be completed.

**WARNING:** Accurately count claims, especially multiple dependent claims, to avoid unexpected high charges, if extra claim charges are authorized.

☒ The Commissioner is hereby authorized to charge the following additional fees by this paper and during the entire pendency of this application to Account No. 01-2224:

☒ 37 C.F.R. 1.16(a), (f) or (g) (filing fees)

☐ 37 C.F.R. 1.16(b), (c) and (d) (presentation of extra claims)

**NOTE:** Because additional fees for excess or multiple dependent claims not paid on filing or on later presentation must only be paid or these claims cancelled by amendment prior to the expiration of the time period set for response by the PTO in any notice of fee deficiency (37 CFR 1.16(d)), it might be best not to authorize the PTO to charge additional claim fees, except possibly when dealing with amendments after final action.

☐ 37 C.F.R. 1.16(e) (surcharge for filing the basic filing fee and/or declaration on a date later than the filing date of the application)

☐ 37 C.F.R. §§ 1.17(a)(1)–(5) (extension fees pursuant to § 1.136(a)).

☒ 37 C.F.R. 1.17 (application processing fees)

**NOTE:** “. . . A written request may be submitted in an application that is an authorization to treat any concurrent or future reply, requiring a petition for an extension of time under this paragraph for its timely submission, as incorporating a petition for extension of time for the appropriate length of time. An authorization to charge all required fees, fees under § 1.17, or all required extension of time fees will be treated as a constructive petition for an extension of time in any concurrent or future reply requiring a petition for an extension of time under this paragraph for its timely submission. Submission of the fee set forth in § 1.17(a) will also be treated as a constructive petition for an extension of time in any concurrent reply requiring a petition for an extension of time under this paragraph for its timely submission.” 37 C.F.R. § 1.136(a)(3).

☐ 37 C.F.R. 1.18 (issue fee at or before mailing of Notice of Allowance, pursuant to 37 C.F.R. 1.311(b))

**NOTE:** Where an authorization to charge the issue fee to a deposit account has been filed before the mailing of a Notice of Allowance, the issue fee will be automatically charged to the deposit account at the time of mailing the notice of allowance. 37 CFR 1.311(b).

**NOTE:** 37 CFR 1.28(b) requires “Notification of any change in status resulting in loss of entitlement to small entity status must be filed in the application . . . prior to paying, or at the time of paying, . . . the issue fee. . . .” From the wording of 37 CFR 1.28(b), (a) notification of change of status must be made even if the fee is paid as “other than a small entity” and (b) no notification is required if the change is to another small entity.

# PROSTHETIC DEVICE

## BACKGROUND OF THE INVENTION

### 5 1. Field of the Invention

The present invention relates to the field of prosthetic devices, and more particularly to a new, unique and attractive device which is especially adapted to conceal women's nipples and which is simple in construction and consequently economical to  
10 manufacture.

### 2. Prior Art.

Women may often choose to wear a brassiere or the like on their breasts in order to provide a pleasing contour to their  
15 figure by the effect of moderate pressure provided by the brassiere. There are times, however, when the use of a brassiere is undesirable. In the summertime, for example thin garments are often worn, and the brassiere is visible through clothing, and this can present an unsightly appearance. The only viable  
20 alternative to this is for a woman to forego wearing a brassiere entirely. At the same time, many women do not want to dispense with the brassiere. This is because the brassiere provides a certain level of modesty and privacy when it is worn. This privacy is lost without the use of the brassiere. In particular,  
25 the brassiere will cover the nipple and areola of a woman. Without the brassiere, the woman's nipple is likely to be visible through the woman's clothing. For many women, this is simply not

an acceptable alternative.

The brassiere also presses upon the breasts and body of the user by its belts and straps with a resultant inherent discomfort and inconvenience. Moreover, the use of a brassiere can be very  
5 uncomfortable in hot weather and can cause excessive perspiration.

### SUMMARY OF THE PRESENT INVENTION

The present invention provides a prosthetic device which is intended to overcome the limitations of the prior art. In particular, the present invention provides a nipple cover which is easy to manufacture and use. The nipple cover provides an effective means of covering a woman's breast so that the nipple is not exposed or visible through thin or sheer clothing. The present invention can therefore be used in instances where the use of a brassiere is not practical. The nipple cover is also an improvement over the use of a brassiere because it is smaller in size and bulk. it also lacks the use of straps and belts which can cause discomfort. The present invention is therefore more comfortable and easier to wear.

## BRIEF DESCRIPTION OF THE DRAWINGS

Figure 1 is a perspective view of the preferred embodiment of the prosthetic device of the present invention.

5 Figure 2 is a cross-sectional view of the prosthetic device.

Figure 3 is a front elevation view of the prosthetic device of the present invention showing how it attaches to the human breast.

10 Figure 4 is an illustration of a human torso without the present invention attached.

Figure 5 is an illustration of a human torso having the present invention attached.

Figure 6 is a perspective view of an alternative embodiment of the present invention.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

A prosthetic device which functions as a nipple cover will be described. In the following description, for the purposes of explanation, specific construction details, arrangements, and materials are set forth in order to provide a more thorough understanding of the present invention. It will be apparent to those skilled in the art, however, that the present invention may be practiced without these specific details. In other instances, well known manufacturing methods and structures have not been described in detail so as not to obscure the present invention unnecessarily.

Referring first to Figure 1, an illustration of the nipple cover 10 of the present invention is shown. As can be seen, the nipple cover 10 has a shape that generally approximates the shape of a female human breast. The present invention consists of a flexible, reusable and flesh-colored apparatus that covers the nipple so that a woman can go braless or wear a thin bra or lingerie. The device will be soft enough to conform to the woman's figure, yet hard enough so that it will not be affected by the shape of the woman's own nipples.

Referring again to Figure 1, the nipple cover 10 of the present invention has a generally hemispherical shape. It is not solid, but rather is hollow on the inside. The present invention is not intended to replace or enhance a woman's breast. Its' intended purpose is to provide a cover for the nipple. The present invention is also not intended to provide support to the

breast, as with a traditional brassiere. Therefore, the nipple cover can be manufactured from a relatively thin material.

Referring next to Figure 2, a cross sectional view of the nipple cover is shown. The nipple cover, as noted above is hollow inside. The thickness of the nipple cover is not uniform. The edges 15 of the device will gradually taper to be thinner near the edges 15. This will allow the nipple cover to blend with the breast surface (as shown in figure 2) for a continuous smoothness.

An absorbent pad 12 is located on the inner portion of the nipple cover, near the center of the device. The absorbent pad 12 is manufactured from a thin, cell-like, material. The purpose of the pad is to absorb perspiration and moisture from the user's skin. The device will also include a number of tiny holes 18. The holes are best shown in Figures 1 and 3. The holes further allow perspiration to be released, thereby increasing the comfort of the user. The holes are concentrated near the center of the nipple cover.

The nipple cover is of sufficient size such that it can cover a user's entire nipple and areola. The cover will also extend a short distance beyond this area to ensure complete coverage. In the preferred embodiment, the nipple cover will extend approximately one-eighth to one-fourth of an inch beyond the areola. The exact size of the nipple cover, however will vary, as will be apparent to those skilled in the art.

The human breast takes on a wide variety of shapes and sizes, and it therefore anticipated that the nipple cover will be

constructed in range of different sizes and styles. The illustration of Figure 1 is therefore intended to be for illustrative purposes only, and is not intended to provide a specific limitation on the size and style of the present

5 invention. It is anticipated that that nipple cover will also be manufactured in a range of different colors, from dark to light. This will enable the nipple cover to match the skin color of the person wearing it.

10 The preferred embodiment of the nipple cover includes an adhesive material 14 which will permit it to more easily attached to the breast. The adhesive material may be tape, glue or other suitable material. In the preferred embodiment, the adhesive will be non-toxic and hypo-allergenic. Referring again to Figure 2, the adhesive 14 does not completely cover the inside surface  
15 of the nipple cover. The adhesive is located only along the outer edges of the cover 10. The adhesive forms an annular ring around the inner edges of the device. In an alternative embodiment, the adhesive may be omitted.

20 The present invention may be manufactured for a single use, or it may be reusable. If the device is manufactured for a single use, then it will have the adhesive permanently attached to the inner surface of the nipple cover. If the device is reusable, then the adhesive can be removed after each use. A new layer of adhesive can then be applied on the surface after  
25 cleaning.

The present invention will be manufactured from a soft "skin-like" rubbery and flexible material. The material will be

flexible so that the device can conform to the shape of the user's breast. The material must be soft in feel and look. At the same time it must be solid enough not to crinkle or change it's smoothness if the user's nipple hardens underneath. The preferred embodiment of the present invention utilizes plastic urethane. It will be apparent to those skilled in the art that other, equivalent materials may also be used with equal effectiveness. The specific material chosen may vary from the preferred embodiment.

An alternative embodiment of the invention is illustrated in Figure 6. In the alternative embodiment, the prosthetic device 20 also covers the breast, and it hides the woman's own nipples. The outer surface of the nipple cover, however, includes a simulated, or synthetic nipple 24. This alternative embodiment can be used when the woman desires to have the appearance of an erect nipple visible through her clothing. The synthetic nipple is manufactured by including a protrusion on the nipple cover in the approximate location where the woman's own nipple would naturally be located. The size and look of the synthetic nipple can be varied as a matter of design choice. For example, the size of the nipple may be exaggerated in some instances.

The description of the present invention has been made with respect to specific arrangements and constructions of a nipple cover. It will be apparent to those skilled in the art that the foregoing description is for illustrative purposes only, and that  
5 various changes and modifications can be made to the present invention without departing from the overall spirit and scope of the present invention. The full extent of the present invention is defined and limited only by the following claims.

## CLAIMS

What is claimed is:

1        1.    A nipple-cover, said nipple cover being adapted to  
2 cover a human breast, said nipple cover having an inner surface  
3 and an outer surface, wherein said outer surface is substantially  
4 smooth, and wherein said inner surface has disposed thereon an  
5 adhesive means for connecting said nipple cover to a human body.

1        2.    The device of claim 1 wherein said nipple cover is  
2 manufactured from a flexible plastic material.

1        3.    The device of claim 1 wherein said nipple cover has the  
2 shape of a hollow hemisphere.

1        4.    The device of claim 3 wherein said nipple cover is  
2 substantially thin.

1        5.    The device of claim 1, further comprising an absorbent  
2 pad disposed on said inner surface of said cover.

1        6.    The device of claim 1, further comprising a plurality  
2 of holes disposed through said cover.

1           7.    The device of claim 1, wherein said cover tapers in  
2 thickness near an edge of said cover.

1           8.    The device of claim 1, wherein said adhesive may be  
2 removed after each use of said cover.

1           9.    A prosthetic device, said prosthetic device being a  
2 hollow, substantially thin, hemisphere, said device having an  
3 inner surface and an outer surface, said inner surface including  
4 means for attaching said prosthetic device to a human breast, and  
5 said outer surface being substantially smooth.

1           10.   The device of claim 9, further comprising a protrusion  
2 coupled to said outer surface, said protrusion having the shape  
3 of a human nipple.
